

# TRASH CAN & FIREWOOD STORAGE UNIT

Taking care of trash and shaping firewood can be messy chores, especially in winter. And it's especially difficult to store the right amount of trash and firewood in your yard or garden landscape. This project will help. Plus, it offers an unexpected bonus: Create a built-in bench storage area to organize tools and protect the tools you use.

This plan was designed to fit into a 10' x 12' patio structure. You can easily adjust the dimensions of the unit to fit the constraints of your space or to handle larger trash and firewood.

## TOOLS REQUIRED

- Circular saw or miter saw
- Hammer
- Square (L)
- Tape measure
- Carpenter's level or square

## MATERIALS LIST

To build this storage unit, you will need the following quantities of CCA pressure-treated Southern Pine lumber:
